Precipitation probability							
30%	50%	30%	30%	40%	30%	20%	30%

Forecast for Friday 26 Mar 2021

Weather: Showers in early hours with snow above 900m, with a longer spell of rain and mountain snow later in the night, and a chance of summit blizzards. A dull start with further outbreaks of rain, with snow levels falling down to about 500m, then becoming brighter with sunny intervals but further showers these turning to snow down to quite low levels, around 300m in the afternoon and perhaps a shade lower in the evening, though by this time the Aberdeenshire and Angus Hills should be dry

Chance of cloud free mountain/hill tops above 800m: 20% at first rising to 60% in the afternoon.

Visibility: Poor or very poor at first in heavy rain and snow, and summit blizzards. Becoming occasionally very good but falling poor, perhaps briefly very poor in snow showers. Cloud: Broken to overcast layers 600-800m at first with lower patches then becoming by day broken or well broken at 800-1100m but falling 600-700m in showers with the odd lower patch

Met Office Aberdeen Meteorologist's View
Summit winds could be a little stronger than the table shows.

Forecast for Saturday 27 Mar 2021

Weather: A few snow showers overnight but dying out to leave a dry and sunny morning and early afternoon. Then high cloud thickening and lowering with more persistent snow, with rain below 500m, arriving late afternoon or early evening though the far northeast staying mainly dry. The rain becoming heavy west of the A9 with snow becoming confined to summits, with blizzards, but even there turning to rain by midnight.

Maximum wind: West 25 gusts 35mph becoming southwest 35 gusts 50mph in the afternoon, backing southerly and strengthening markedly in the evening with stormy conditions and speeds increasing 70 gusts 95mph.

Chance of cloud free mountain/hill tops above 800m: 90% in the morning and until mid afternoon, with only some high cloud around, falling quickly to reach 10% by mid evening as layered cloud at 500-800m arrives.

Visibility: Very good until late in the day then falling poor or very poor in the evening.

Temperature: **Glens:** Minus 2 at dawn rising to Plus 7 in the afternoon.
At 800m: Minus 2 rising to Plus 3 during the evening.
Freezing level: All levels at dawn rising to 600m during the morning then up to 900m in the evening, later 1200m.
